MAIL STOP PETITIONS

Commissioner for Patents
United States Patent and Trademark Office
P.O. Box 1450
Alexandria, VA 22314-1450

Sir:

Petition to the Director to Withdraw Abandonment Under CFR 1.181

I hereby declare that all statements made herein of my own knowledge are true, and that all statements made on information and belief are believed to be true; and further that these statements are made with the knowledge that willful false statements, and the like so made, are punishable by fine or imprisonment, or both, under Section 1001, Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

- 1. I am Scott Moskowitz, President of Blue Spike, Inc., and a co-inventor of the above captioned patent application.
- 2. The patent application was originally filed and assigned to Blue Spike, Inc. (attached Exhibits F, G, H, and I).
- 3. I filed a Non-Final Office Action Response and Revocation of Power of Attorney November 22, 2004 (Exhibits D and E).
- 4. I received a telephonic communication from Mr. Floyd Chapman at the time the Office Action of March 15, 2005 was received by his firm (Wiley Rein & Fielding), which had previously represented Blue Spike, Inc. in the prosecution of the above captioned patent application, regarding Examiner Tsai's instructions to correct the

- originally filed Revocation of Power of Attorney to include Mike Berry as aginventor.
- 5. On or about March 15, 2005, I called Expanded and she explained to me what needed to be done to correct the filing.
- 6. I relied entirely on the instructions of Examiner Tsai and promptly filed Revocations of Power of Attorney for both myself and Michael Berry in order to comply with her instructions.
- 7. I called Examiner Tsai several times between the end of March 2005 and the beginning of April 2005 to confirm that the corrected Revocation of Power of Attorney had been received (Exhibits B) and to confirm that my previous response was now being recognized by the U.S. Patent & Trademark Office (Exhibit A).
- 8. On or about April 1, 2005, I again contacted Examiner Tsai to confirm that the corrected papers were filed, and I specifically asked if any other documentation was necessary to have her recognize my previous response.
- 9. To the best of my specific recollection, Examiner Tsai said in exact words or substance that "no other documents were needed".
- 10. I did not hear from Examiner Tsai until she contacted me by telephone saying that the application is abandoned because both inventors did not sign the Response of November 22, 2004. This came as a surprise to me because I had specifically asked Examiner Tsai if I needed to take any other action to respond to the outstanding Office Action of November 22, 2004.
- 11. As a pro se inventor I contacted the Patent & Trademark Office for guidance on remedies and was instructed to speak with Supervisory Examiner Marc Hoff on or about December 14, 2005.
- 12. The recommendation was to file this Petition to Withdraw an Abandonment under CFR 1.181 and a Request to Proceed on Behalf of a Sole Assignee under CFR § 3.73(b).
- 13. I am requesting the Commissioner to withdraw the Notice of Abandonment based on the facts that I had provided a substantive response in a timely manner and I had made every effort to comply with the express instructions of the Examiner who attempted to assist me with responding to the Office Action. At all times, I believed I

PATENT

Attorney Docket No.: EX95001-US

had fully responded to the Office Action and that I had taken all necessary actions to have the response recognized.

- 14. I am attaching the following relevant Exhibits:
- A) Notice Regarding Change of Power of Attorney & Notice of Acceptance of Power of Attorney (Mailed April 19, 2005);
- B) Revocation of Power of Attorney signed by Michael Berry & Scott Moskowitz (March 25, 2005);
 - C) Office Action (Mailed March 15, 2005);
 - D) Response to Non-Final Office Action (Dated November 22, 2004);
- E) Revocation of Power of Attorney signed by Scott Moskowitz (Dated November 22, 2004)
- F) U.S. Patent & Trademark Office Notice of Recordation of Assignment Document (Recordation Date December 12, 2000, Reel/Frame 011365/0665);
- G) Assignment signed by Michael Berry and Scott Moskowitz to Blue Spike, Inc. (Signed November 2000);
- H) Original Declaration and Power of Attorney signed by Michael Berry and Scott Moskowitz (November 20, 2000);
- I) Verified Statement (Declaration) Claiming Small Entity Status (37 CFR 1.9(f) and 1.27(c)) Small Business Concern signed by Scott Moskowitz as President of Blue Spike, Inc. and Michael Berry and Scott Moskowitz as joint inventors (November 20, 2000).

Respectfully submitted,

Date: December 29, 2005

DETAILED ACTION

Response to Amendment

1. The reply filed on November 22, 2004 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s):

The amendment is improper because it was not signed by the attorney of record or by both inventors and is inconsistent with the declaration which lists two inventors instead of Moskowitz being the sole inventor, as asserted on the "Revocation of Power of Attorney" filed November 22, 2004. If Applicants want to correct the inventorship, a petition in compliance with 37 CFR 1.48 must be filed. See 37 CFR 1.111. Since the above-mentioned reply appears to be bona fide, applicant is given ONE (1) MONTH or THIRTY (30) DAYS from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

Contact Information

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carol S. W. Tsai whose telephone number is (571) 272-2224. The examiner can normally be reached on Monday-Friday from 8:30 AM to 5:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marc S. Hoff can be reached on (571) 272-2216. The fax number for TC 2800 is (703) 872-9306. Any inquiry of a general nature or relating to the status of this application or proceeding should be

Art Unit: 2857

directed to the TC 2800 receptionist whose telephone number is (571) 272-1585 or (571) 272-2800.

In order to reduce pendency and avoid potential delays, Group 2800 is encouraging FAXing of responses to Office actions directly into the Group at (703) 872-9306. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 2800 will be promptly forwarded to the examiner.

REQUEST FOR EXTENSION OF TIME AND RESPONSE TO OFFICE ACTION

Sir:

This application is U.S. Patent Application No. 09/657,181, filed September 7, 2000. In response to the non-final Office Action, dated July 22, 2004, Applicants submit the following response:

Request for Extension of Time

Applicants hereby request a one (1) month extension of time to reply to the Office Action dated July 22, 2004. The time for response is therefore extended up to and including November 22, 2004. A credit card payment form in the amount of \$55.00 to cover the required fee is enclosed with this filling.

REMARKS/ARGUMENTS

Rejections under Double Patenting

§ 101 Rejections based on a judicially created doctrine of provisional obviousness-type double-patenting

Applicants respectfully traverse the Examiner's assertion that the instant invention's Claim 1 (and all claims depending therefrom) is not patently distinct from co-pending Application No. 09/671,739 Claim 1. While Applicants may disagree with the premise of the rejection, if Claim 1 of US Patent Application No. 09/671,739 is issued as a patent, Applicants will file a terminal disclaimer at that time.

Rejections under 35 U.S.C. § 112 first paragraph must assess whether there is written description to support the claim language

Claims 1-25

Applicants respectfully traverse the rejection of claims 1-25 under 35 USC §. 112 first paragraph.

See MPEP § 2163(II)(A)(3)(b), at 2100-165 ("To comply with the written description requirement of 35 USC § 112, para. 1, ... each claim limitation must be expressly, implicitly, or inherently supported in the originally filed disclosure") (emphasis added); see also *Martin v. Mayer*, 823 F.2d 500, 505 (Fed. Cir. 1987) ("[The written description analysis] is 'not a question of whether one skilled in the art might be able to construct the patentee's device from the teachings of the disclosure. ... Rather, it is a question whether the application necessarily discloses that particular device."") (quoting *Jepson v. Coleman*, 314 F.2d 533, 536, 136 U.S.P.Q. (BNA) 647, 649-50 (CCPA 1963)). In this case, the claim limitation at issue is "query signal". Thus, "query signal" must be the focus of a "written description" analysis.

The Federal Circuit has found that the purpose of the requirement is to protect against over-reaching claims that may be added by amendment after the filing date:

Satisfaction of the description requirement insures that subject matter presented in the for of a claim subsequent to the filing date of the application was sufficiently disclosed at the time of filing so that the prima facie date of invention can be fairly held to be the filing date of the application.

Vas-Cath Inc. V. Mahurkar, 935 F.2d 1555 (Fed. Cir. 1991) (quoting In re Smith and Hubin, 481 F.2d 914 (CCPA 1973) (citations omitted)). In this case, there can be no doubt

that the claim language at issue, "query signal", was present in the application as originally filed on September 7, 2000. Accordingly, there can be no doubt that the policy behind the written description requirement is met.

It is well settled that "to satisfy the written description requirement, the disclosure as originally filed does **not** have to provide *in haec verba* support for the claimed subject matter at issue." *Purdue Pharma L.P. v. Faulding Inc.*, 230 F.3d 1320, 1323 (Fed. Cir. 2000) (citing Fujikawa v. Wattanasin, 93 F.3d 1559, 1570 (Fed. Cir. 1996)) (emphasis added).

In this application, however, there is in haec verba support. Thus, the rejection should be withdrawn.

Rejections under 35 U.S.C. § 112 second paragraph

Claims 1-25

Applicants respectfully traverse the rejection of claims 1-25, 35 USC §. 112 second paragraph.

Contrary to the Examiner's assertion that "query signal" is indefinite, the term is widely understood in the art of databases. One of the most widely deployed database technologies is "SQL" meaning "structured query language". Applicants affirm that the term query signal is not repugnant to the meaning of the term "query" alone. A "query signal" as disclosed refers to the "signal" being monitored or analyzed. Indeed, Claim 1 makes this very clear when it recites [emphasis added]: "receiving at least one query signal to be analyzed." In other words, a "query signal" is a signal that is being queried. Because this is a made clear in at least the Summary and in the original claims, the Applicants request the rejection to be withdrawn.

MPEP § 608.01(a) "The description should be as short and specific as is necessary to describe the invention adequately and accurately. Where elements or groups of elements, compounds, and processes, which are conventional and generally widely known in the field of the invention described, and their exact nature or type is not necessary for an understanding and use of the invention by a person skilled in the art, they should not be described in detail."

With regards to Claim 24, the Specification teaches that the "criteria" is used by the processor in creating "an abstract", and, so, Claim 24 is merely referencing that the same criteria is shared between the "processors".

Rejections under 35 U.S.C. § 102

§ 102 Rejections based on Rhoads

Claims 1, 4-6, 8, 12, 13, and 16-20 stand rejected as allegedly anticipated by U.S. Patent No. 6,430,302 issued to Rhoads (hereafter Rhoads). (See page 4 of the Office Action).

Claim 1, 8, and 13 (and all claims depending therefrom)

In order for a reference to anticipate a claim, the reference must disclose each and every limitation of the claimed invention, either expressly or inherently, such that a person of ordinary skill in the art could practice the invention without undue experimentation. See Atlas Powder Co. v. Ireco Inc., 190 F.3d 1342, 1347, 51 USPQ2d 1943, 1947 (Fed. Cir. 1999); In re Paulsen, 30 F.3d 1475, 1479, 31 USPQ2d 1671, 1673 (Fed. Cir. 1994). Independent Claim 1 recites, inter alia, [emphasis added]: "A method for monitoring and analyzing at least one signal comprising: receiving at least one reference signal to be monitored; creating an abstract of said at least one reference signal; storing the abstract of said at least one reference signal in a reference database; receiving at least one query signal to be analyzed; creating an abstract of said at least one query signal; comparing the abstract of said at least one query signal to the abstract of said at least one reference signal to determine if the abstract of said at least one query signal matches the abstract of said at least one reference signal." The 102 rejection based on Rhoads is improper for at least the reason that Rhoads fails to disclose "creating an abstract of said reference signal" and "storing the abstract of said at least one reference signal in a reference database."

In fact, Rhoads' description that, "[t]he N-bit identification word refers to a unique identification binary value ... which is the Identification code placed onto the original signal ... " Rhoads, at col. 4, II. 33-38 indicates independence from the original signal, not an abstract created from a reference signal, contrary to the Examiner's assertion. Rhoads' "N-bit identification code word" is, thus, allegedly an independent "invisible signature" encoded in such a manner as to yield a "distributable signal" not an abstract to be stored in a reference database, Rhoads at col. 38, II. 33-38: "[b]riefly and for the sake of clarity, the phrases and terms 'signatures,' 'invisible signatures,' and 'signature codes' have been and will continue to be used to refer to the general techniques of this invention and often refer specifically to the composite embedded code signal as defined early on in this disclosure." Being independent from the "reference signal" Rhoads' "embedded code" cannot be equivalent with the Applicants' "abstract". Rhoads teaches away from Applicants' claim limitation: ""creating an abstract of said reference signal" and "storing the abstract of said at least one reference signal in a reference database."

Second, that this identification code is encoded *into* the original signal makes it inaccessible without the original signal, *Rhoads* at col. 5 II. 21-28, "... [t]he N-bit identification word is encoded onto the original signal by having each of the m bit values multiply their corresponding individual embedded code signals, the resultant being accumulated in the composite signal ... the resultant composite signal added to the original to become the distributable signal." With Rhoads there is no "query signal" from which an abstract is created. Thus, Rhoads does not teach the claim limitation: "receiving at least one query signal to be analyzed; creating an abstract of said at least one query signal; comparing the abstract of said at least one query signal matches the

abstract of said at least one reference signal." Instead, the original signal is differenced with a suspect signal (more on this aspect below). This approach teaches away from creating abstracts based on a reference signal, storing said abstracts in a database, and comparing query signal abstracts with the reference signal abstracts in the database, contrary to the assertions of the Examiner.

Third, Rhoads' description of how his "invisible signatures" are decoded teaches away from the Applicants' invention. Rhoads allegedly relies on the embedded code signal[s] for identification, not comparisons of "reference signal abstracts" with "query signal abstracts" – no abstract is disclosed. At the very least, Rhoads' original signal[s] inherently lack the encoded invisible signature and, thus, cannot equate to the abstracts of the Applicants. In fact, Rhoads differences a "suspect signal" with the "original signal" to attempt recovery of the N-bit identification word. Why use abstracts for identification purposes if invisible signatures must first be extracted from the suspect signal based on a comparison with the original signal? Rhoads at col. 5 ll. 57-60: "[o]nce the suspect signal has been sample-spacing matched and registered to the original, the signal levels of the suspect signal should be matched in an rms sense to the signal level of the original. This can be done via a search on the parameters of offset, amplification, and gamma being optimized by using the minimum of the mean squared error between the two signals as a function of the three parameters." Additionally, Rhoads at col. 5 ll. 66 – col. 6 ll. 10:

The newly matched pair then has the original signal subtracted from the normalized suspect signal to produce a difference signal. The difference signal is then cross-correlated with each of the N individual embedded code signals and the peak cross-correlation value recorded. The first four bit code ('0101') is used as a calibrator both on the mean values of the

zero value and the one value, and on further registration of the two signals if a finer signal to noise ratio is desired (i.e., the optimal separation of the 0101 signal will indicate an optimal registration of the two signals and will also indicate the probable existence of the N-bit identification signal being present.)

If the original and suspect signals are compared to yield a difference signal which is then used to determine if the "N-bit identification signal [is] present", including use of a "0101" "calibrator", Rhoads teaches away from the Applicants' claim limitations for creation of an "abstract" from a "reference signal" for later comparison with the "abstract" of a "query signal". Rhoads discloses further examples of his decoding scheme at col. 17 II. 35 – col. 18 II. 5. Rhoads' approach may make recovery of the N-bit identification word impossible (more on this additional point below).

Fourth, the identification word of Rhoads is not an "abstract" but "noise," *Rhoads* at col. 17 II. 40. Rhoads discloses several times that his N-bit identification word is akin to "noise." See *Rhoads* at col. 3 II. 50-53; col. 15 II. 54-57; col. 17 II. 14-16; col. 17 II. 61-64; col. 20 II. 38-42; and, the lengthy description provided at col. 23 II. 55 — col. 24 II. 50. Because this noise becomes inherent to the original signal even comparisons with the suspect signal for decoding purposes may result in "erasing" the "embedded code." If such erasure occurs how can it be compared with a query signal abstract? Rhoads discloses the problem, "[a]t step 9, FIG. 3, if we were to subtract the 'original' with its embedded code, we would obviously be 'erasing' the code as well since the code is an integral part of the original. Fortunately, remedies do exist and identifications can still be made. However, it will

be a challenge to artisans who refine this embodiment to have the signal to noise ratio of the identification process in the pre-exposed negative case approach the signal to noise ratio of the case where the un-encoded original exists," *Rhoads* at col. 13 II. 20-28. An "abstract", as disclosed by the Applicants, is not noise, and cannot be "erased."

Because Rhoads fails to disclose (1) "creating an abstract of said at least one reference signal", (2) "storing the abstract of said at least one reference signal in a reference database", and (3) "comparing the abstract of said at least one query signal to the abstract of said at least one reference signal to determine if the abstract of said at least one query signal matches the abstract of said at least one reference signal" as required by Claim 1, the Section 102 rejection of Claim 1 must be withdrawn. Moreover, for the same reasons that Claim 1 is patentable over Rhoads, independent Claims 8 and 13 and the claims that depend from Claims 1, 8 and 13 also are patentable. Applicants request the Examiner withdraw the Section 102 rejections of Claims 1, 8, and 13, and all claims depending therefrom, based on Rhoads.

Rejections under 35 U.S.C. § 103

In order to "establish a prima facie case of obviousness, three basic criteria must be met." MPEP § 7.06.02(j). First, there must be some motivation or suggestion to modify the reference or to make the proposed combination. Second, there must be a reasonable expectation of success. "The teaching or suggestion to make the claimed combination and the reasonable expectation of success must both be found in the prior art, and not based on the applicant's disclosure." MPEP § 2142 (citing *In re Vaeck*, 947 F.2d 488, 20 USPQ2d 1438 (Fed. Cir. 1991)). Third, the combined references must teach or suggest all claim limitations.

§ 103 Rejections based on Rhoads

Claims 21 (and all claims depending therefrom)

Claim 21 has been rejected under 35 U.S.C. § 103(a) as being unpatentable over Rhoads. Examiner asserts that, "Rhoads discloses an electronic system for monitoring and analyzing at least one signal, comprising: a first input that receives at least one reference signal to be monitored, a processor that creates an abstract of each reference signal input to said first processor through said first input...", Office Action at 6, Applicants respectfully disagree.

It is unclear how the Examiner construes the term "multiprocessor" as this term is not part of the claim language. The Examiner's Official Notice regarding a combination of Rhoads with "multiprocessor" is also not clear to the Applicants. Applicants thus respectfully request clarification on the 103 rejections based on Rhoads and "multiprocessor."

As previously presented, Rhoads, allegedly discloses a method for embedding an N-bit identification word into an original signal. Decoding the N-bit identification word requires differencing the unencoded original signal and a suspect signal to yield a difference signal. This difference signal looks like noise and cannot be independently decoded. It is not an abstract nor is there any comparison between a reference signal abstract, stored in a reference database, with a query signal abstract as required by the claim limitations.

None of the claimed elements are disclosed by Rhoads, including: (1) "a first input that receives at least one reference signal to be monitored"; (2) "a first processor that creates an abstract of each reference signal input to said first processor through said first input"; (3) "a second input that receives at least one query signal to be analyzed, (4) "a second processor that creates an abstract of each query signal"; (5) "a reference database that stores abstracts of each at least one reference signal"; and, (6) "a comparing device that compares an abstract of said at least one query signal to the abstracts stored in the reference database to determine if the abstract of said at least one query signal matches any of the stored abstracts." Rhoads does not disclose any of the claimed elements in independent Claim 21. Applicants therefore request that Examiner withdraw the Section 103 rejections of Claims 21 (and all claims that depend therefrom).

Comments concerning Allowable Subject Matter

Examiner explains that: "Claims 2, 3, 7, 9-11, 14, 15, and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims" Office Action at Page 7.

Applicants maintain that the term "query signal" is common to the art of databases including the pervasive "SQL" or "Structured Query Language". This is the most common database in use today and at the time of the instant invention's filing was well-known to artisans.

MPEP 707.07(j) states: "When, during the examination of a *pro* se application it becomes apparent to the examiner that there is patentable subject matter disclosed in the application, the examiner should draft one or more claims for the applicant and indicate in his or her action that claims would be allowed if incorporated in the application by amendment." Applicants are proceeding pro se and request clarification on the how the cited claims can be rewritten if the term "query signal" continues to be objectionable.

Conclusion

Applicants maintain that this application is in condition for allowance, and such disposition is earnestly solicited. If the Examiner believes that an interview with Applicant, either by telephone or in person, would further prosecution of this application, we would welcome the opportunity for such an interview.

Respectfully submitted,

ASSIGNMENT

WHEREAS, WE, Scott A. Moskwotiz, residing at 16711 Collins Avenue, #2505, Miami, Florida, 33160, USA, and Michael W. Berry, 12401 Princess Jeanne, Albuquerque, New Mexico, 87112, USA, have invented certain new and useful improvements in and to the subject matter of:

METHOD AND DEVICE FOR MONITORING AND ANALYZING SIGNALS

described in an application for United States Letters Patent filed on September 7, 2000, and accorded Application No. 09/657,181;

AND, WHEREAS, Blue Spike, Inc., a corporation organized under the laws of the State of Florida, having a place of business located at 16711 Collins Avenue, #2505, Miami, Florida, 33160, USA (hereinafter "ASSIGNEE"), is desirous of acquiring certain rights to the improvements and under the application;

NOW, THEREFORE, in consideration of the sum of One Dollar (\$1.00) or the equivalent thereof, and other good and valuable consideration, receipt of which is hereby acknowledged, we do hereby sell, assign and transfer unto said ASSIGNEE, its successors, assigns and legal representatives, our entire right, title and interest in and throughout the United States of America (including its territories and dependencies) and all countries foreign thereto in and to said improvements, said United States application, any other United States applications, including provisional, divisional, renewal, substitute, continuation, reexamination and reissue applications, based in whole or in part on said United States application or in whole or in part on said improvements, any foreign applications, including international and regional applications, based in whole or in part on any of the aforesaid United States applications or in whole or in part on said improvements, and in and to any and all letters patent, including extensions thereof, of any country which have been or may be granted on any of the aforesaid applications or on said improvements or any parts thereof;

AND WE hereby authorize and request our attorneys, Brobeck, Phleger & Harrison LLP, whose address is 1333 H Street, N.W., Suite 800, Washington, DC 20005, to insert hereon any identification necessary or desirable for recordation of this document, including the filing date and application number of said application when known.

AND WE hereby agree for ourselves and our heirs, executors and administrators to execute without further consideration any further documents and instruments which may be necessary, lawful and proper in the prosecution of said above-referenced application or in the preparation or prosecution of any continuing, substitute, divisional, renewal, reexamination or reissue application or in any amendments, extensions or interference proceedings, or other applications for patents of any region or country, that may be necessary to secure to ASSIGNEE its interest and title in and to said improvements or any parts thereof, and in and to said several patents or any of them;

AND WE hereby covenant for ourselves and our legal representatives, and agree with said ASSIGNEE, its successors and assigns, that we have granted no right or license to make, use, sell or offer to sell said improvements, to anyone except said ASSIGNEE, that prior to the execution of this deed, our right, title and interest in said improvements had not been

VERIFIED STATEMEN STATUS (37 CFR 1.9(1	Docket No. 066112.1032							
Application No.	Filing Date	Patent No.	Issue Date					
109/657,181	September 7, 2000							
Applicant/ Scott A. Me Patentee:								
Invention: Method an	Invention: Method and Device For Monitoring and Analyzing Signals							
I hereby declare that I am:	,	:	,					
the owner of the s	mall business concern identi	fied below:	•					
図 an official of the si	mall business concern empo	wered to act on behalf of the	concern identified below:					
NAME OF CONCERN:	Blue Spike, Inc.							
ADDRESS OF CONCERN:	16711 Collins Avenu	e, #2505, Miami, Florida :	33160 USA					
I hereby declare that the above-identified small business concern qualifies as a small business concern as defined in 13 CFR 121.3-18, and reproduced in 37 CFR 1.9(d), for purposes of paying reduced fees under Sections 41(a) and (b) of Title 35, United States Code, in that the number of employees of the concern, including those of its affiliates, does not exceed 500 persons. For purposes of this statement, (1) the number of employees of the business concern is the average over the previous fiscal year of the concern of the persons employed on a full-time, part-time or temporary basis during each of the pay periods of the fiscal year, and (2) concerns are affiliates of each other when either, directly or indirectly, one concern controls or has the power to control the other, or a third party or parties controls or has the power to control both.								
	under contract or law have h regard to the above-identif	been conveyed to and rema led invention described in:	in with the small business					
the specification fil	ed herewith with title as liste	d above.						
☑ the application identified above.								
the patent identified above.								
If the rights held by the above-identified small business concern are not exclusive, each individual, concern or organization having rights to the invention is listed below and no rights to the invention are held by any person, other than the inventor, who could not qualify as an independent inventor under 37 CFR 1.9(c) or by any concern which would not qualify as a small business concern under 37 CFR 1.9(d) or a nonprofit organization under 37 CFR 1.9(e).								
	:	. · . ·

I acknowledge the duty to file, in this application or patent, notification of any change in status resulting in loss of entitlement to small entity status prior to paying, or at the time of paying, the earliest of the issue fee or any maintenance fee due after the date on which status as a small entity is no longer appropriate. (37 CFR 1.28(b))

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application, any patent issuing thereon, or any patent to which this verified statement is directed.
